

MEGA Wireless Control System

Small and compact wireless unit, ideal for all 12V DC powered cranes as well as the hydraulic powered units that have the on/off type of control system. It offers great service at a very attractive price. With the Mega FM Radio system the crane still maintains the use of the standard wired controller. This economical wireless FM control system is available as a retro fit on most Liftmoore cranes either electric or hydraulic cranes with the on/off controls.
