

LIFTMOORE ELECTRIC CRANE WIRELESS CONTROL WITH WI-FI DIAGNOSTICS

Liftmoore's latest wireless control system with expanded diagnostics to improve service at all levels:

Crane Operator Information

Input and output of the wireless control

Transmitter shows signal confirming it is transmitting correctly

Receiver shows signal whether or not it is receiving the transmitter's signal

Additionally, all safety system inputs as well as control circuit outputs are monitored

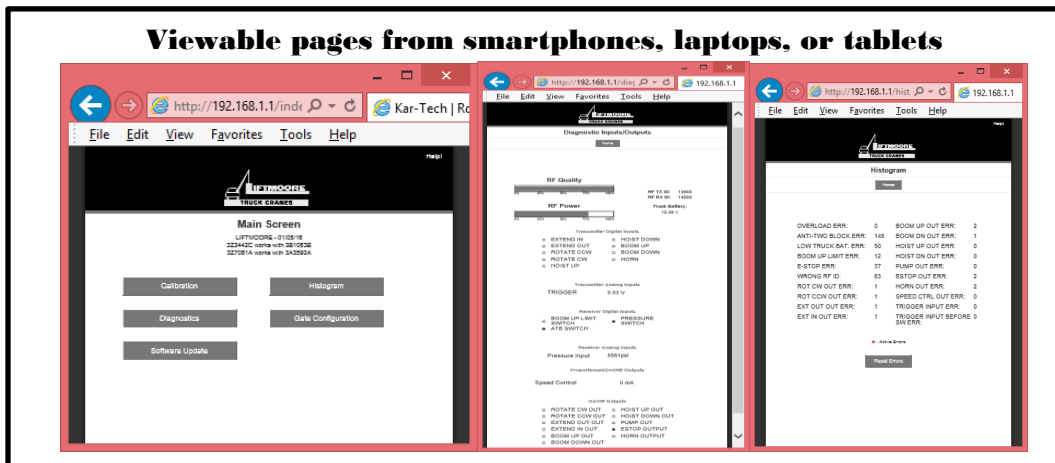

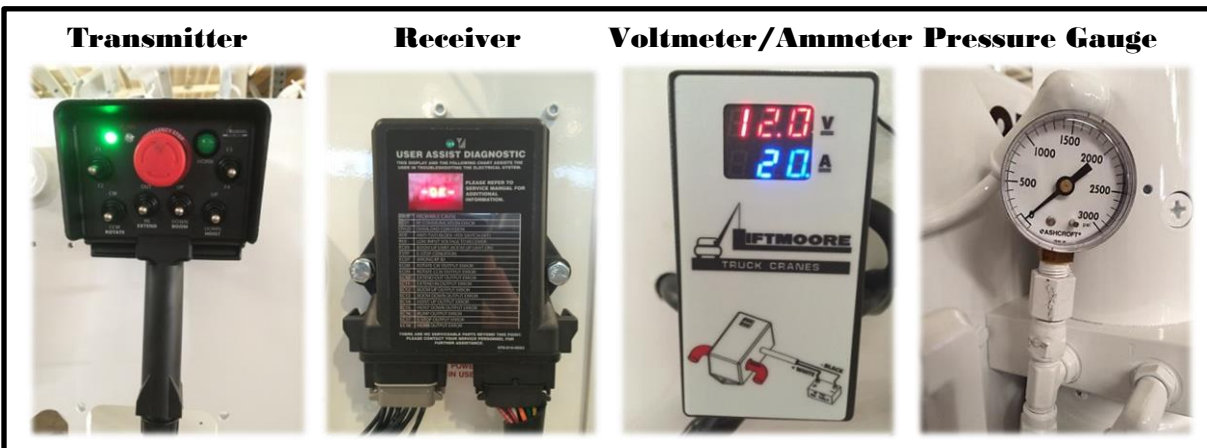

Error codes are visible on the receiver for all of these monitored inputs and outputs

Voltage and Amperage in a digital readout

Pump Pressure

Distributor Technician Information

Wi-Fi Diagnostic Tool, readable from virtually any Wi-Fi enabled device

Available Beginning June 2016
